Gateway Science Academy of St. Louis (GSA) is a public charter school that provides its K-12 students with an innovative world class education, rich in math, science and technology.

Mission
The mission of the Gateway Science Academy of St. Louis is to provide quality education with an emphasis on science, mathematics, and technology while balancing all core subjects. We strive to create an atmosphere that provides students, parents, and teachers opportunities for continuous growth, enabling them to reach their highest potential.

WHAT MAKES GSA UNIQUE?

STEM program
GSA has a unique focus on science, technology, engineering and math (STEM), and uses an inquiry-based curriculum. Their goal is that all instruction, across all core subjects, is hands-on and student-engaged. In addition, they incorporate technology in all instruction. Teachers work diligently to ensure that students are processing and going deeper into the knowledge of what they’re learning.

To supplement the STEM-focused curriculum, several math and science clubs are available to students. Their student teams frequently achieve success at robotics, advanced math, and other competitions.

College Readiness
GSA works diligently to prepare students for their future after high school graduation. Their education program is designed for all students, and they meet all students’ needs in order to ensure academic success – whether that be weekend school for students who need extra support, or additional enrichment opportunities for students who are accelerated learners. In addition, the extended school day and year model ensures that all students have sufficient time to learn.

GSA places a strong focus on college readiness, and begins providing individual post-high school guidance for stands in the eighth grade. In addition, the school provides a college readiness class, prep for the AP exams, and more.

To date, GSA students have a 100% high school graduation rate, and a 100% four-year university acceptance rate.
