Why do some public school children receive less?

Funding inequities result in charter school students receiving $1100.00 less per student in weighted average daily attendance than their public school peers.

PUBLIC SCHOOL FUNDING IS NOT EQUITABLE

PROPERTY TAXES
STATE FUNDING
FEDERAL FUNDS
DEBT SERVICES FUNDS
CAPITAL PROJECT FUND
PAYMENTS IN LIEU OF TAXES
MERCHANTS & MANUFACTURER FUNDS

INEquality #1
Historical Data vs Current Year Data

Charter school funds are based on information from as long ago as 2005.
Meanwhile local districts are compensated using current year revenues.

INEquality #2
Exclusion of Revenue Resources

Charter school students are excluded from receiving some local funds that are available to district children.

- Debt service fund revenues
- Capital project fund revenues
- Merchants & manufacturers tax revenues
- Payments in lieu of taxes (Kansas City)

The only way to solve this problem is to change the Missouri law governing how funds are allocated. Support ALL PUBLIC SCHOOL CHILDREN!
